In response to the Examiner's Office Action dated January 29, 2002, please

amend the above-identified application as follows:

IN THE CLAIMS

Please replace claims 1, 11 and 15 with the following.

Claim 1. (Amended)

A system of dynamic module configuration which is linked through a

network comprising:

a memory linked to the network, for storing a plurality of function

executing modules which execute specific processes;

a request device which outputs an execution request for executing one of

the specific processes; and
